

WE THINK DIFFERENTLY ABOUT POWER

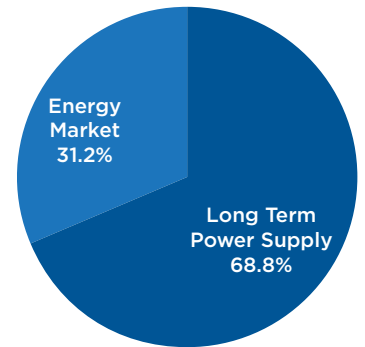

AT THE CITY OF HUDSON, WE THINK DIFFERENTLY ABOUT POWER SUPPLY.

Our locally owned municipal electric system combines professional long-term power supply planning with a diverse, sustainable portfolio to deliver reliable, competitively-priced electric energy and mitigate market volatility.

As a customer, businesses can take advantage of our key account customer engagement service to strengthen account relationship and identify cost saving energy management options. Customers also benefit from our reliable electric system and ease of communications when unexpected emergencies demand a rapid response time.

For more information on our long-term power supply or energy services, please contact our local economic development contact shown on our Community Page at www.searchampsites.com or American Municipal Power, Director of Business Development, 614.540.0849, bdewitt@amppartners.org.
